Understanding System Performance Measures

Homelessness should be:

Rare

Prevent or divert new episodes of homelessness
Access resources without a shelter stay

Brief

Reduce length of time while homeless
Reduce program length of stays
Increase exits to permanent housing

Non-recurring

Reduce returns to homelessness
Focus on housing stability
Create access to resources without another shelter stay

**Are we submitting
accurate data?**

SPM Submission Process

- Iterative process – back and forth corrections and re-running reports
- Every two to three weeks, we will focus on a different set of issues
- Data could cover 10/1/2015 – 9/30/2019 (FY18 or FY19 submissions)

Data must be cleaned prior to submission

The next slides will show the most common red flags and how to resolve them in ServicePoint.

- Missing Data
- Incomplete or Conflicting Sub-assessments
- Un-exited or Overlapping Clients

Data must be cleaned prior to submission

Issue	Issue Guidance and Resolution
Client Location outside of this CoC	Update the Client Location to NC-503 Balance of State, using EDA and Back Date Mode.
Annual Assessment outside of 30 +/- days	Create an Annual Assessment on the Head of Household's Project Start Date or within 30 calendar days before or after their Project Start Date. Change the incorrect Interim to the "Update" type.
Entries to Level 4 Projects (Agency level)	Create a Project Start for the client using EDA mode for the appropriate Level 5 project and Back Date mode to the appropriate date. Remove the incorrect entry after confirming data was copied.
Exit Destination is Safe Haven, Other, or Data Not Collected	Review. If different information is available, update the answer to reflect where the client went to after your project. If the current answer is the most accurate, please inform the Data Center. Note: Safe Haven must be updated since North Carolina does not have Safe Haven projects.

Data must be cleaned prior to submission

Issue	Issue Guidance and Resolution
Exit to Permanent Housing with a Return to Homelessness	Review the client's Exit Destination and update to the most accurate temporary location to reflect they returned to a homelessness situation.
Date of Engagement (SO Projects only)	Date of Engagement can be added on the Project Start Assessment if applicable. If not, add an Interim Update to record the date of engagement. Make sure to EDA and Back Date before making any changes or updates
Length of Stay (ES & TH)	Confirm the length of stay is accurate or using EDA and Back Date Mode, set an Exit Date for the client.
Overlaps (Start Dates, Move-In Date, Exit Date)	Double check that client information is accurate in HMIS. In general, add the correct information first, and then remove old inaccurate information second. Always use EDA and Back Date modes. For Move-In Date corrections, click the colored bar next to the date to remove responses.
